Advisor: George Chondrakis

Research Group: Strategy & Entrepreneurship

Research Interests:

- Strategic Sourcing
- Buyer-Supplier Relationships
- Merge and Acquisition

Short Bio:

Raana Bagheri is a Ph.D. candidate in Strategic Management at Esade Business School, Universitat Ramon Llull. Her research examines how firms design resource acquisition strategies under uncertainty, focusing on plural sourcing, resource redeployability, and strategic adaptation in patent prosecution. She complements her research through conference participation, research collaboration, and an international research stay at Copenhagen Business School.

Raana holds a Master of Research (MRes) in Management Sciences from Esade Business School, an MBA in Technology Management from Amirkabir University of Technology, and a Bachelor's degree in Electrical Engineering (Power) from Shahid Chamran University.

With more than 18 years of professional experience, Raana brings extensive industry expertise to her academic work. Before transitioning to academia, she served as an engineering manager in several private-sector firms, working across engineering management, procurement, and international business relations. She has also contributed to teaching activities as a Teaching Assistant (TA). Her background combines analytical rigor with hands-on experience in managing complex projects and strategic partnerships.
