

Master in Sustainability Management

Become an agent of change

Sustainability affects every area of business since companies depend on functioning ecosystems and societies. Companies increasingly see that sustainability issues demand systemic approaches that create a wider impact for their value chains and industries.

The MSc in Sustainability Management develops action-oriented professionals who are capable of creating new solutions and enterprises, and transforming existing companies, with the objective of contributing to a sustainable future.

What will you learn?

This Master's program prepares you for a leading role in shaping a sustainable future. You will develop the skills to analyze and transform organizational strategies, policies, processes, products, services, and business models. Upon graduation, you will be equipped to immediately contribute to sustainable change within any organization.

Who is it for?

The Esade Master in Sustainability Management is designed for individuals interested in:

Business: developing and implementing sustainability strategies within companies.

Consulting: providing expert advice on sustainability matters.

Social Entrepreneurship: launching businesses with a positive social impact.

Research: investigating sustainability topics in academic and governmental settings.

Nonprofit and Government: advocating for and driving systemic change.

EMPOWERING LEADERS IN SUSTAINABILITY

The program builds skills to understand sustainability challenges, navigate organizational complexity, and drive ambitious goals. Participants will learn to collaborate effectively, lead diverse teams, and design transformations that overcome resistance while fostering support for sustainability initiatives.

Esade Difference

1. Management FOR Sustainability

The program equips you with rigorous tools to use the power of business for contributing to a sustainable future.

2. Hands-on Experience

Work closely with a company and tackle its sustainability challenge in a half-year project. You will also engage with real situations through fieldwork, site visits, guest speakers, and more.

3. Systemic Approach

Build a systemic and long-term view of managing for sustainability: the Master connects environmental, socio-economic, political, and legal factors.

4. Community of Practice

Get access to international companies, social entrepreneurs, activists, leading thinkers and think tanks, NGOs and governmental organizations in the Esade network.

5. Reputation

Begin your postgraduate education among the business leaders of tomorrow, in one of the best Master's programs in the world.

6. Personal Growth

As a successful professional in Sustainability Management, you need personal maturity, besides knowledge and skills, to make a difference. This Master helps you grow as a person.
