

2023 Sustainability Week Curricular Activities

Bachelor in Global Governance, Economics & Legal Order

1st Year

INSTITUTIONS & DECISION-MAKING

Faculty: Lligadas Gonzalez, Gemma

This session will cover the theoretical framework necessary to carry out a simulation of the Financing for Development UN Conference, aimed at achieving the Millennium Development Goals in sessions 5 and 6 of the course.

2nd Year

STRATEGIC THINKING FOR GLOBAL GOVERNANCE

Faculty: Aznar Alarcon, Juan Pedro

Students will reflect on the challenges associated to climate change, in particular, how Game Theory can be used to understand the conditions that favour climate change agreements.

3rd Year

NATURAL RESOURCES AND GEOPOLITICS STRATEGY

Faculty: Molina Alsina, Jordi

The management and exploitation of natural resources is a key national-policy issue on the global stage. Students will study production systems and their environmental impact, the relationship between natural resources and economic growth, the geopolitics of energy sources, conflict minerals and their geopolitical implications, and governance and future challenges in the management of natural resources.
