- Master in Project Management from La Salle BCN
- Aeronautical Engineering (Equivalent to BBA + MEng) from Universitat Politècnica de Catalunya

### Areas of interest

Organizational tensions and paradoxes, Social Impact Bonds, Housing, Critical Realism, Phenomenology, Ontology.

### Biography

Ferran Torres is a PhD candidate in Management Sciences at Esade Business School. His research interests span different levels: from the discussion around paradigms related with the philosophy of science, to the study of tensions and paradoxes around social issues. He works in conceptual and qualitative pieces with different co-authors, exploring the nature of paradoxes, and the ecosystems around Social Impact Bonds and housing.

Before pursuing the PhD, Ferran worked in an engineering company, both as a Commercial Engineer and as an Aeronautical Engineer, coordinating the relationship with AESA. He also worked as a Project Manager in the same company in several projects for the Catalan Public Administration.

### Selected publications

Torres, F. & Hahn, T. "Harnessing Infinity: Explaining the Persistence of Organizational Paradox through Morphogenesis". *Academy of Management Proceedings*. Vol. 2021. No. 1. <https://doi.org/10.5465/AMBPP.2021.13886abstract>
