Support to member states in studies and capacity building activities to reduce alcohol related harm

PRINCIPAL**INVESTIGATOR:**

Eva
Jané

PERIOD:

September 2020 – March 2023

FUNDING BODY:

European Commission – Consumer, Health,
Agriculture and Food Executive (CHAFEA)

REFERENCE:

Service Contract No 20197105

RESEARCH TEAM:

Gemma Rabal

**SUMMARY:**

This research study was funded as response to the Call for Tenders Chafea/2019/Health/05 concerning support to Member States in studies and capacity building activities to reduce alcohol related harm. The tender proposes an overarching integrating task that ensures a horizontal and practical approach throughout the project to continuously address alcohol within the frame of Health In All Policies and build the findings of the project on the broader framework of the Sustainable Development Goals. This approach will illustrate how we involve, leverage and develop expertise “outside the health sector” for the policy areas intrinsically linked with advancing reductions in alcohol related harm, and thus essential to have an effective member state capacity to deliver it. This overarching task is built in to ensure it answers and focuses on understand the complexity of the health in all policies approach in case of alcohol related harm and help them to implement integrated and effective harm reduction alcohol policies.
